SUMMARY

I am an experienced Press Machine Operator with strong organizational, multitasking, and problem-solving skills. After completing a bootcamp in harisenin web development , I am now seeking a career as a frontend web developer with ReactJS. I am excited to apply my skills and passion for coding to create visually appealing and intuitive web applications.

EXPERIENCE

Press Machine Operator
PT. KMK Global Sports K2   **April 2021 - July 2022, Tangerang**
• Operates the press machine in a safe manner and in accordance with company policies; yielding a 90% safety inspection rate and 0.5% defect rate.
• Create a suitable formula for the spraying process/procedures, which improved the finished product's (outsole) quality and optimized production, resulting in a 30% reduction in defects.
• Spraying the outsole of footwear adhering to safety regulations and specific customer specifications, while maintaining a production rate of 120 units per hour.

Production Team Member
PT. Hitoshi Buana Perkasa   **November 2020 - April 2021, Tangerang**
• Produced 120~ units daily across product lines with a 95% success rate, meeting customer orders and delivery expectations.
• Spearheaded a daily report of the produced products regarding quantity and quality, ensuring that the production process was within the measured parameters.
• Assisting operation leader regarding preparing tools and machines for production. Improving worktime efficiency by 10% through streamlining of routines.

EDUCATION

Bachelor of Informatics Engineering
Universitas Muhammadiyah Tangerang • Tangerang • 2021 • 3.79 GPA

CERTIFICATIONS

TOEFL Prediction Test
Elskill • 2023
Collaborating in an English environment project

COURSEWORK

Belajar Pemrograman Dasar Javascript
Dicoding Indonesia • Javascript • 2022

Modern React with Redux
Udemy • ReactJS • 2023

PROJECTS

- **"Urban-Threads" – Frontend web application that displays products and allows users to add items to their cart and complete a purchase. Developed using ReactJS, Redux-Toolkit, Tailwind, DaisyUI, PocketBase(SaaS), React-Hook-Form, and Framer-Motion. Link : https://urban-threads.vercel.app/**

- **"BlitBiz" – Blitbiz is the number one online business marketplace platform in Indonesia built using MERN (MongoDB, Express, React, Node.js) technology. I was involved in developing this platform with a focus on frontend development using ReactJS. My tasks included UI/UX design, implementing new features, and bug fixing. Throughout the project, I successfully improved the platform's performance and provided a better user experience. Link: https://staging.blitzbiz.id/**

SKILLS

Hard Skills: ReactJS, Javascript, Redux ,Html, CSS, Tailwind, Bootstrap, Git, Github

Soft Skills: Communication, Teamwork, Problem-solving, Critical Thinking, Creativity, Openness To Criticism, Time Management, Adaptability

Technical Skills: Web Development, Frontend

Languages: English, Indonesia

Field of Interest: Frontend
